Doc update for NetApp HCI

With the NetApp HCI 1.8 release, we're excited to announce that we added a lot more information about NetApp HCI in docs.netapp.com.

For this update, you'll find these new topics:

- A release notes section that gathers what's new and release notes for NetApp HCI, NetApp Element software, management services, and NetApp Element Plug-in for vCenter Server all in one place
- A new getting started installation and deployment overview
- More how-to's related to expanding and monitoring your system
- A section for basic concepts, such as what clusters and nodes are and an explanation of quality of service levels that you can set to manage performance
- A centralized location for how to upgrade NetApp HCI end-to-end, including how to update management services, HealthTools, Element software, and the Element Plug-in for vCenter Server

Take a look and contribute to this documentation for NetApp HCI. You can edit, request a change, or even send feedback. Go to [NetApp HCI documentation](#) to begin.

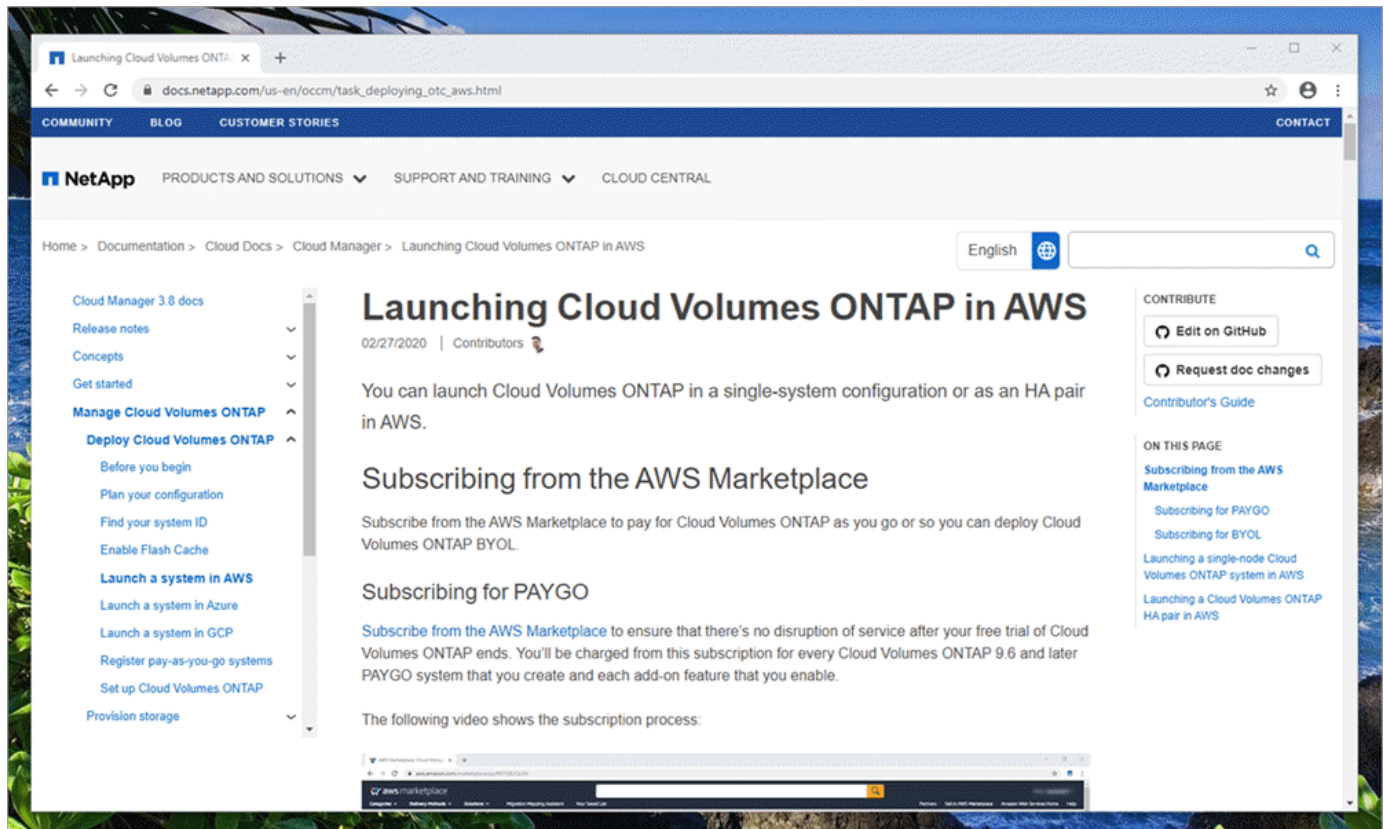

Enhanced user experience

We're pleased to announce that we have enhanced the user experience for our GitHub-based documentation on [docs.netapp.com](#). These changes provide a more consistent

experience across NetApp online content.

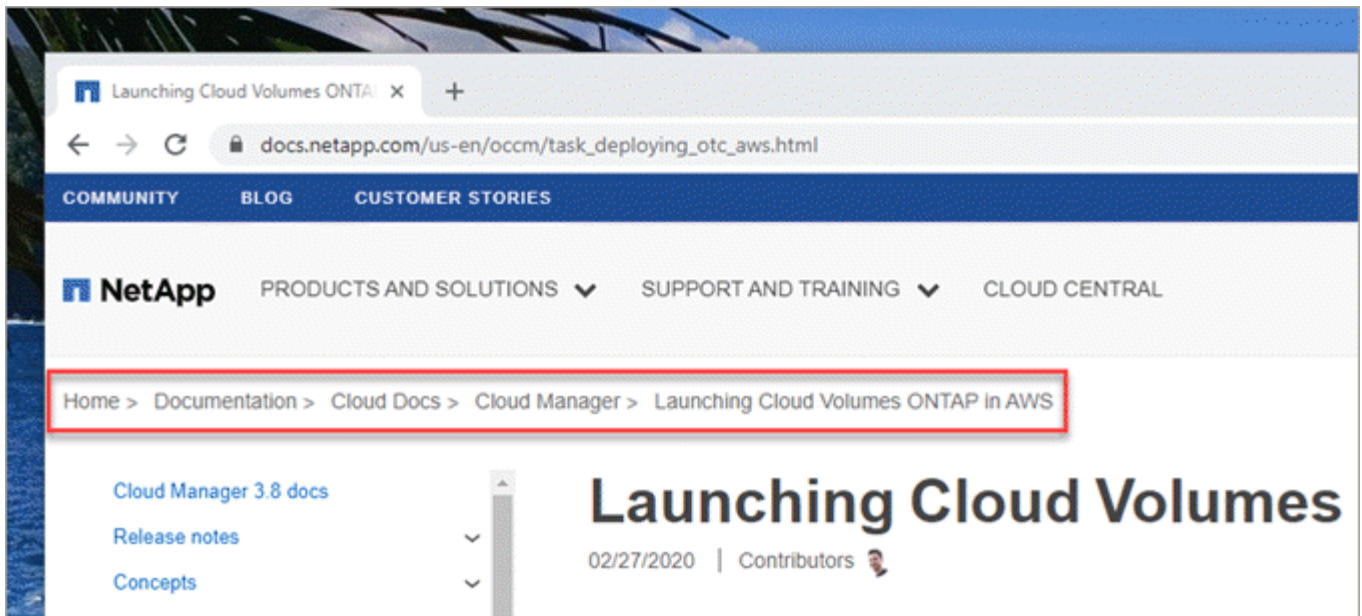

Layout and style

The layout and style of the docs now more closely resembles what you'll find on netapp.com. This includes font and color, the layout of the left and right navigation, and the header and footer.

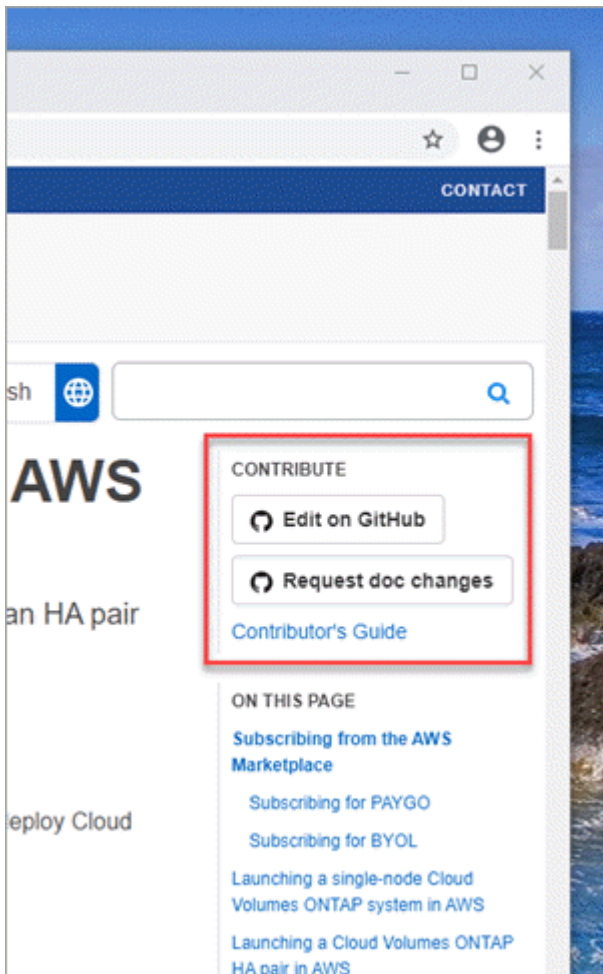

Breadcrumbs

We've added breadcrumbs that make it easier for you to navigate across NetApp documentation. For example, you can click **Documentation** to head back to docs.netapp.com.

Links to contribute

Links to contribute to our content have been consolidated above the page-level navigation. These links are always visible as you scroll through the content. So if you find an issue anywhere in the page, you can click a button to directly submit changes or to provide us with your feedback.

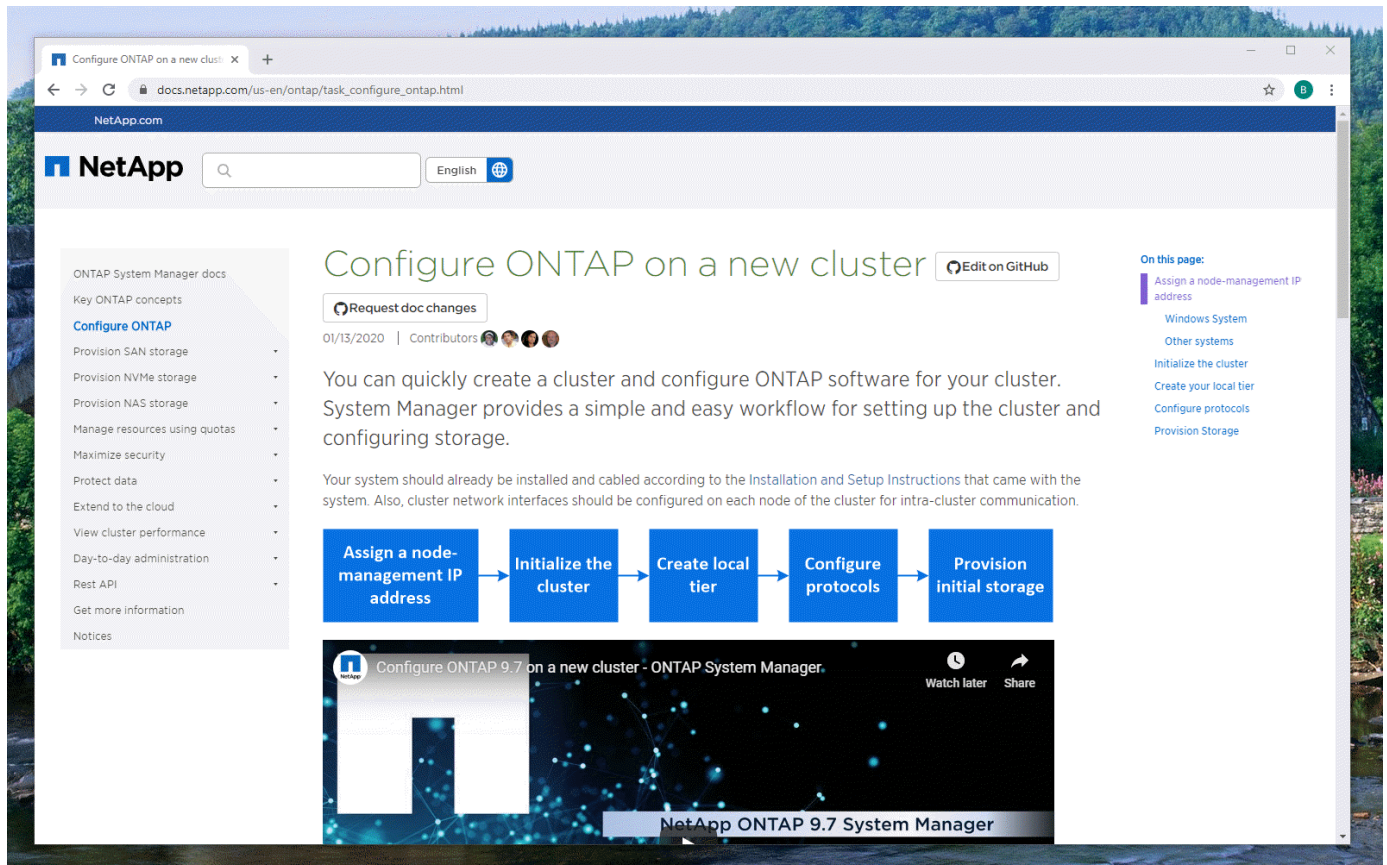

Docs for ONTAP System Manager

Now that ONTAP 9.7 is Generally Available, we wanted to announce that we added redesigned content for ONTAP System Manager to docs.netapp.com.

Beginning with ONTAP 9.7, a totally redesigned ONTAP System Manager simplifies ONTAP management with an intuitive graphical user interface. The new dashboard shows key cluster status and performance on one screen.

The documentation for ONTAP System Manager is totally redesigned as well. Easy-to-navigate content is quick and easy to use. Watch embedded videos for quick overviews of major management tasks.

Go to the [ONTAP System Manager documentation](#) to get started.

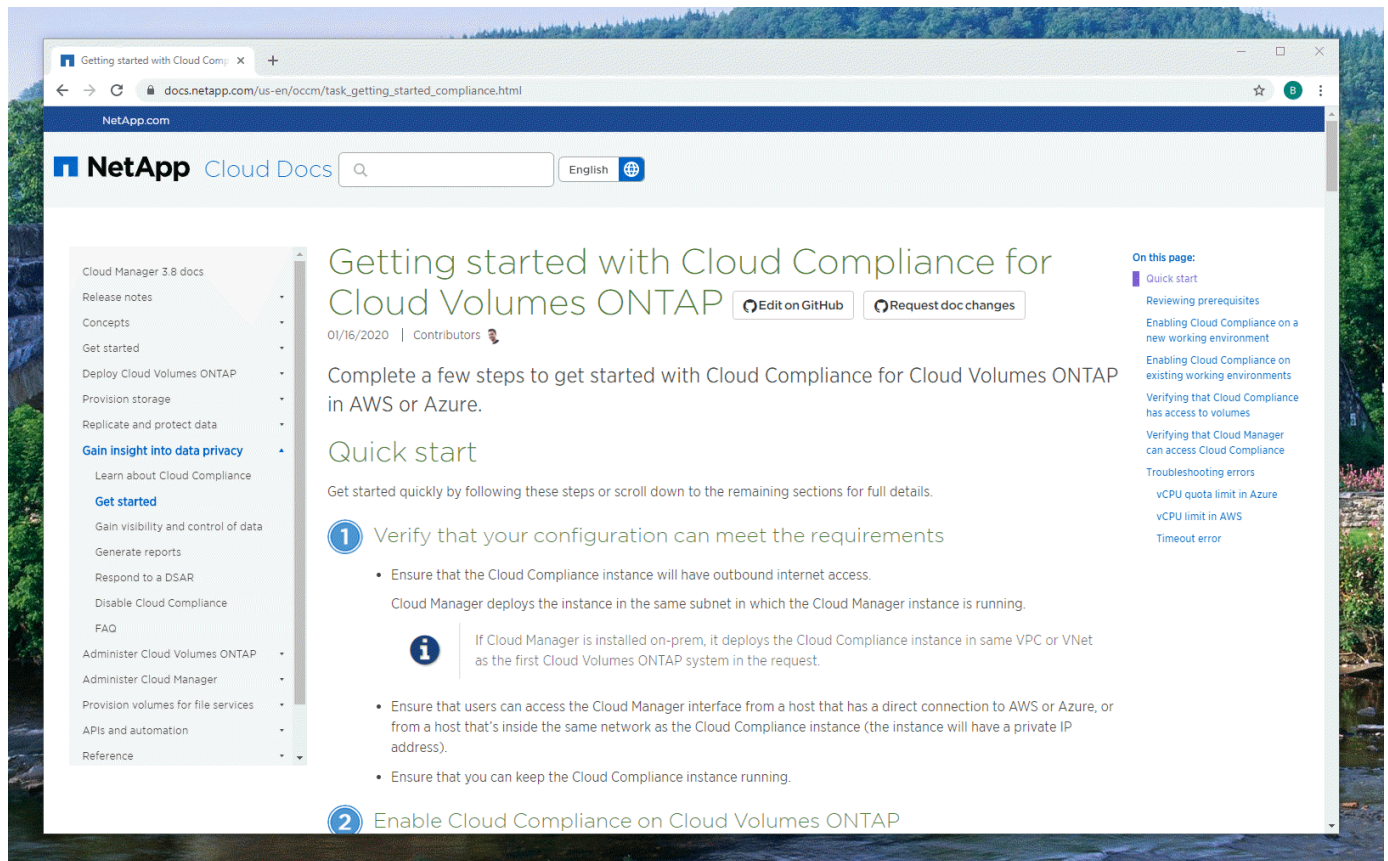

Docs for Cloud Compliance

Right before the end of 2019, we added content in the Cloud Manager documentation for the Cloud Compliance service.

Cloud Compliance is a data privacy and compliance service for Cloud Volumes ONTAP in AWS and Azure. Using Artificial Intelligence (AI) driven technology, Cloud Compliance helps organizations understand data context and identify sensitive data across Cloud Volumes ONTAP systems.

Cloud Compliance is operated and managed through Cloud Manager. You can access Cloud Compliance features from the **Compliance** tab in Cloud Manager.

Go to the [Cloud Manager documentation](#) to learn how to get started.

Docs for ONTAP Select

We recently added content for ONTAP Select. The content can help you with ONTAP Select running on VMware ESXi, and it provides hypervisor-independent documentation for using the ONTAP Select Deploy REST API.

We're excited about this change because the content authoring team combined content from multiple sources into one searchable online library.

Take a look and contribute to this new documentation experience for ONTAP Select. You can edit, request a change, or even send feedback. Go to the [ONTAP Select documentation](#) to get started.

11/24/2019 | Contributors

You need to install the ONTAP Select Deploy administration utility and use the utility to create an ONTAP Select cluster.

Downloading the virtual machine image

You can download the ONTAP Select package from the NetApp support site.

About this task

The ONTAP Select Deploy administration utility is packaged as a virtual machine based on the Open Virtualization Format (OVF) standard. The single compressed file has the suffix `.ova`.

Steps

1. Access the NetApp support site using a web browser and click **Support Quick Links**.
2. Click **Download Software** under **Top Tasks** and sign in.
3. Click **Find your product**.
